

As a taxpayer and registered voter I strongly urge to reject petition 04-160. I feel in the interest of fair play we should not be overly hasty in trying to protect the interest of a few broadcasters at the expense of the rights of the nation as a whole. What this Country needs in the field of broadcast communications is more freedom and competition. I believe Satellight radio and television bring that to the marketplace. It is not the purpose of the FCC to decide which business will be allowed to be successful. To my knowlege, satellight signals do not interfere with radio signals so I believe they should be viewed as a completely seperate from traditional broadcast media and as such be governed by their own set of rules and regulations. To limit this new indusrty at this stage would be detremental to the tecknological development of this nation so I do hope that any decisions made will be in the best interest of the consumer and not the NAB.

Thanks,

Scott G Gladden
